Chapter 1	The Correct Foundation	12
	The Breeding Process	12
	Taking Responsibility	13
	The Breeder	13
	Breeding for Profit	15
	Acquiring the Right Dog	16
	“Show Dog” Versus “Working Dog”	16
	Identification and Registration	17
	Tattooing procedures	18
	Why Breed with German Shepherd Dogs?	19
	Adult or Puppy	19
	Male or Female	20
Chapter 2	Instruments of Selection	21
	Participation within Formal Structures	21
	The Show Ring	21
	Why dogs should be shown	22
	Aesthetic value	23
	Ear carriage	24
	Anatomy and movement	25
	Colour	25
	Anatomical evaluation	27
	Champion titles versus the grading system	27
	Training Tests and Evaluations	27
	Types of training tests	28
	Schutzhund (SchH) as a basis for breed selection	29
	The Breed Survey	31
	The Pedigree	33
Chapter 3	Breeding Principles	38
	The Breeder and the Science of Genetics	38
	The Basic Genetic Principles	40
	The Chromosomes	40
	Characteristics controlled by a single gene	41
	Characteristics controlled by a series of gene pairs	42
	Homozygous versus heterozygous	43
	Hereditary pathway	45
	Sex chromosomes	46
	Prepotency	47
	The effect of environment on genes	48

	Systems which Decrease Genetic Variation	49
	"Like to Like" or "Type to Type" matings	49
	Inbreeding	50
	Wright's inbreeding coefficient	55
	Blood percentage	57
	Systems which Increase Genetic Variation	58
	Improving on a Bitch of Low Quality	59
	Improving on Specific Points	60
	Sex Influenced Traits	61
	Alternative Gene Transfer	62
Chapter 4	Selection of Breeding Stock	63
	Selecting the Parents	63
	Your Own Stud Dog	66
	Replacing a Brood Bitch	67
	Improving Your Bitch Stock	68
	Importing a Bitch	69
	Evaluating Breeding Stock	71
	Bloodlines	73
	Experimental Breeding	73
Chapter 5	Important Genetic Disorders	75
	Hip Dysplasia	75
	Prevalence in German Shepherd Dogs	75
	Hip dysplasia eradication schemes	76
	Hereditary impact	78
	Dietary impact	79
	Conclusions	79
	Elbow Dysplasia	80
	Ununited anconeal process	82
	Elbow joint incongruency	82
	Fragmented medial coronoid process	82
	Osteochondritis dessicans and osteochondrosis	82
	Acalasia and Problems of the Oesophagus	83
	Haemophilia	83
	Von Willebrands Disease	85
	Epilepsy	86
	Absence of Testicles	86
	Cleft Palate	87
	Umbilical Hernias	88
	Renal Diseases	88
	Ear Carriage	88
	Dwarfism	90
	Dentition	90
Chapter 6	Planning a Litter	93
	The Bitch in Season	93
	The Bitch	96
	Age at mating	96
	Readiness to mate	97

Using a vasectomised male	97
Other factors affecting mating and the resultant fertility	98
The tie	99
Factors Influencing Litter Size	99
Stress	99
Feeding	100
Competition and kennel stress	100
Genetic	100
Age	101
Number of matings	101
The male	101
Disease	102
Hormone Treatment	103
Terminating an unwanted pregnancy	103
Avoiding heat periods	103
Cycling bitches	103
Increasing fertility	104
Artificial Insemination	104
Keeping Records	105
The basics	105
A filing system for bitches and puppies	106
Chapter 7	
Pregnancy to Whelping	111
The Pregnant Bitch	111
Diagnosing pregnancy	111
Physical signs of pregnancy	111
Gestation period	112
Phantom pregnancies	112
Feeding	113
Drugs and de-worming	114
Transporting	114
Exercising	115
Whelping Facilities	115
The whelping kennel	115
The whelping box	116
Heating and cooling	117
The Whelping	118
Determining the time of whelping	118
Preparing the whelping box	119
Final preparations	120
Use of calcium and oxytocin	121
Inducing birth	122
When to do a Caesarean section	122
The first puppies	123
Whelping problems	124
The afterbirth	125
The umbilical cord	125
Birth weights	126
Assisting Survival	126

Chapter 8	Rearing a Litter	127
	The Newborn Puppies	127
	Cleaning Up	127
	Culling Puppies	128
	Exercising the Bitch	128
	Removal of Dew Claws	129
	Optimal Litter Size	129
	Fostering	129
	Mastitis	130
	Feeding	131
	De-worming	132
	External Parasites	133
	The Puppy Run	133
	A Mobile Play Pen	134
	Weaning	134
	Vaccination	134
	Socialising	135
	Time to Sell	136
	Registration and Documentation	136
Chapter 9	Managing a Stud Dog	138
	Qualifications	138
	Condition	138
	Mating a Bitch	139
	The first mating	139
	The tie	139
	Assisting	141
	Bookings	141
	Payment Options	142
	Marketing	143
	Record Keeping	144
Chapter 10	Marketing Your Breeding	145
	The Price of a Puppy	145
	The cost of producing or acquiring an article	146
	Supply and demand	146
	Competition	146
	Determining Value	146
	The quality of the parents	147
	The quality of a puppy	147
	Education of clients	147
	After-sales support	148
	Guarantees	148
	Marketing and Advertising	148
	Your own web site	149
	Essentials of web site design	150
	Additional advertising	150
	Planning an advert	150

Do's and Don'ts of Advertising	151
Do emphasise the positive qualities that you have selected for	151
Do emphasise the particular virtues of your kennel	151
Do emphasise the fact if you are a member of a specialist organization	151
Don't limit your marketing to exhibitors and competitors	151
Don't mislead your potential clients	152
Don't attack other breeders	152
Selling a Litter	152
Placing adverts	152
Dealing with telephonic enquiries	153
Dealing with the client directly	154
Establishing compatibility	154
Closing the sale	155
Collection	155
Sending Puppies by Air	155
Puppy Packs	156
Education and Follow-up	157
After Sales Service	158
Encouraging the buyers of your pups to show	158
Dealing with Dissatisfied Customers	158
Replacing a Faulty Puppy	161
Appendices	162
Appendix A – Internationally Recognised Registrations	162
Appendix B – Useful Web Addresses	165
Appendix C – Abbreviations	166
Appendix D – Important Qualifications Awarded to Dogs in Germany	167
Show grading	167
Breed survey	167
Training qualifications	167
Hip and elbow gradings	168
References	169
Index	171
